

Snyder Manufacturing, Inc.

Superior fabric providing consistency, durability and quality

Snyder Manufacturing is an American manufacturer of high performance laminated fabrics, coated mesh and extruded films. With more than 65 years of experience, you can rest assured our quality products will surpass your expectations. We strive to provide custom solutions for a wide range of applications for commercial, industrial and governmental customers across multiple industries. All products are made and manufactured in the U.S.A., and most are Berry Amendment compliant.

We are the industry leader in producing materials with high quality workmanship for the tent and structural fabric market. Our custom-engineered fabrics are designed to meet the unique needs of each customer. As an ISO 9001 Registered Company you can trust our commitment to providing high quality, competitively priced products with personalized service.

We recently introduced two new fabrics, WeatherSpan™ 1818 and MasterMesh. WeatherSpan™ 1818 is 50% stronger than typical tent material. Its performance and strength make it an ideal choice for tents and structures. MasterMesh features a flat stitch, providing more privacy and less transparency. It also works as a printing surface.
