

Tentnology Co.

Where mathematics meet emotion

For 45 years Tentnology Co. has brought innovation to fabric structure technology. Original patented designs with premium quality materials and master craftsmanship have made Tentnology an industry leader.

Tentnology brings a new generation of permanent and temporary fabric structure solutions to the market. Reactive and revolutionary products can respond to market demands for creative designs, exact engineering and precise manufacturing—all in record time and economic feasibility.

Our capabilities include turnkey in-house design, engineering and manufacturing of 14 families of fabric structures in unlimited shapes and sizes. We offer sexy, curvaceous silhouettes, taut lines, tensioned membranes, poles, ropes and vinyl...and you thought tents were boring!

PRODUCTS: Products are backed with engineering certification founded on knowledge-based analysis with proprietary CAE software. Tentnology CAE Software: computer aided engineering within AutoCAD environment; no frills, direct to form, force and stress design of fabric structure for precise design. Add-on Tentnology Darwin optimizes structure and creativity. Tentnology craftsmen produce to ISO_2001 International Quality Assurance Standards.
