

BilJax

Durable. Reputable. Dependable.

To make work safer and easier. Our idea in 1947. Our mission today.

As a leading pioneer in the event industry, BilJax developed the first engineered tent floor system for clearspan tents. The system is engineered to seamlessly integrate with the industry's most popular tents. Our components incorporate the tent structure directly with the floor. The TF2100 is proven to save time and money and can accommodate various heights and slopes.

FASTER SETUP: Quick to install and dismantle, saving up to 45 percent on labor costs and reducing employee fatigue.

BETTER ROI: Minimal components leading to faster teardowns, allowing for quicker turns.

FEWER HEADACHES: Simple ring lock scaffold understructure, with tent upright connectors integrating directly with the floor.

Working with you to accomplish all of your at-height projects safely and simply.

PRODUCTS: Flooring, staging, seating, scaffold.
