

Point of Rental Software

Event rental, from planning to pickup

Point of Rental Software is the platform event rental experts use to manage all the logistics involved in an event, from planning to pickup. Founded in 1983, Point of Rental has spent the last 37 years developing the industry standard feature set, raising the bar with each development cycle.

In 2019, the company began updating all of its products using sprint cycles, ensuring that users always have the most up-to-date technology running their businesses. From internal location tracking to PartyCAD to contract fulfillment, the software is full of features that make event rental more efficient and enjoyable for business owners, employees and customers.

There's a reason Point of Rental won back-to-back *InTents* Reader's Choice Awards. With more than 600 years of in-store experience on staff, the company uses its knowledge to provide the industry's best service and software.

PRODUCTS: Inventory management software, event planning software, customer relationship management software, delivery tracking, SaaS inventory management, Windows-based inventory management, electronic signature tracking and storage, equipment tracking, KPI reporting.
