

Aztec Tents

A tradition of fine craftsmanship, innovative design and superior service

An innovative leader within the international tenting marketplace, Aztec Tents excels in providing superior quality products throughout the special events industry. Since 1966, Aztec Tents has produced award-winning tents and structures for event rental companies, hotels, country clubs, caterers, award shows, governments and other custom, off-site event locations.

Aztec is one of the most recognized tent manufacturers in North America for its diversity of product and strong collection of tent professionals, with exclusive representatives throughout the U.S., Europe and Australia. The company's extensive service team includes sales, production, engineering and manufacturing personnel to support each product.

Vice President of Aztec Tents, Alex Kouzmanoff, says, "Aztec Tents looks forward to continuing its dedication to innovation and excellence, which has served our clients well for many decades."

Aztec Tents has been honored with several IFAI International Achievement Awards for its outstanding specialty fabrics projects, including the Outstanding Achievement Award in the tent manufacturing category. Aztec's outstanding customer service has been noted in leading industry publications.

PRODUCTS: Frame tents, pole tents, tension tents, structures, Compatible Plus®, custom products, tent accessories.

B & R Innovations LLC

Providing a safe and effortless approach to tent ballasting

Block and Roll® Tent Ballast Solutions was born out of experience—the team at Block and Roll compiled a wish list of features and designed a system to give tent rental companies an efficient way to ballast tents and inflatables when staking isn't an option.

Our versatile patented system allows for easy and safe handling of cement blocks with or without a forklift. Block and Roll blocks have multiple tie-off points for secure tensioning, and are stackable for increased weight and easy storage. We offer equipment to handle blocks from 350-pound to 700-pound weights without the use of a forklift, making it an innovative way to manage and move cement tent ballasts. Bigger blocks are also available.

Block and Roll's innovative products for the event industry include:

- Premade cement blocks
- Block mover carts
- Block plates for structure/clearspan tents
- Steel block forms & rental
- Keder track clamps
- Portable exit signs
