

## Bil-Jax

### *Celebrating 75 Years!*

We are proud to provide the foundation for life's greatest celebrations and experiences all over the world. Thankyou for choosing Bil-Jax for all your event staging and tent flooring needs the last 75 years. Here's to the next 75 years.

Get to know the simplest, fastest, safest, and most adaptable tent flooring system in the industry. The Bil-Jax TF2100 Tent Flooring System. Helping you work more efficiently, and providing substantial labor savings. The first patented engineered tent floor system for clearspan tents. Engineered to seamlessly integrate with the industry's most popular tents: Anchor, Eureka, Liri, Losberger, Roder, Shelter and more. Our components incorporate the tent structure directly with the floor. The TF2100 is proven to save time and money and can accommodate various elevations and terrains. We help you place a tent on any landscape.

**PRODUCTS:** Tent flooring, event staging, scaffold

### *JackJaw® Extractors Make Stake Pulling Easy!*

JackJaw® extractors are the fast, easy and safe way to pull tent and inflatable stakes. The powerful, patented jaw mechanism allows you to pull stakes straight out of the ground or asphalt without bending them. The jaw mechanism provides a positive grip that prevents back and shoulder strain that results from the whiplash of other pullers. Two sizes of JackJaw® models with enormous pulling power for stakes from 3/16" – 1 ¼". The JJ030X sturdy lever arm gives you a 16 to 1 mechanical advantage. A 100lb down force on the handle generates a 1600lb upward force and a 3200lb gripping force on the post. The JJ050X models give you a 28 to 1 mechanical advantage and delivers 2800lbs of upward force. Use the AC0009 adapter, with the models with extendable bases, for pulling from stake bar systems. The easily replaceable jaws are case hardened AR400 steel for long wear. JackJaw® units have a zinc and clear chromate plating for long lasting durability and corrosion resistance. JackJaw® Extractors are produced in Dayton, Ohio, from heavy-gauge steel plate and tubing to withstand everyday jobsite use. Over 50 different models for pulling concrete form stakes, utility ground rods, sign posts, t-fence posts, anchor cables and more!
