

USA Event Carpet

Recycled carpet that showcases sustainability

USA Event Carpet is excited to introduce our eco-friendly recycled event carpet, meticulously crafted to fulfill your event needs while making a significant impact on waste reduction. This innovative carpet is made entirely from recycled PET bottles, showcasing your commitment to sustainability and environmental responsibility.

What sets our carpet apart is its lifecycle. After your event, an impressive 80% of the carpet will be recycled for future use. The remaining 20%, which may be lost due to staples used during installation, will be supplemented with new recycled PET bottles to create more carpet. This closed-loop process ensures that our product actively contributes to diverting thousands of tons of waste from landfills each year.

By choosing our recycled carpet, you are participating in a remarkable and positive change within the event industry. Not only do you embrace an eco-friendly solution that aligns with your budget, but you also gain the convenience and peace of mind that comes with environmentally responsible practices. Join us in making a difference, and let your events leave a lighter footprint on our planet while still delivering on quality and style.
